Q. Is there a plan to have YODAT provide services in Auckland sometime soon?

A. Yes, YODAT has recently helped Dementia Auckland to establish a young onset-specific day service in Auckland, which runs one day a week. Please contact Dementia Auckland for more information about this day service.

Q. My Life's Journey app: How will this work for people who may not have access to the internet, or prefer in person / 'hard copy' formats to have a family access portal so we can view what's on there but not edit?

A. If people don't have access to the internet then they will not be able to access or download the app.

Currently the app can only be accessed via an email address as part of the sign/login process. Therefore anyone provided with the login access would have full editing rights. There has been interest for third parties to be provided with viewing access only and this is an enhancement that is currently being considered for the app.

Another enhancement being considered is the ability to print "hard copy" content that is on the app.
