

Research at Ryman

Dr Emma Eason

Importance of Research at Ryman

1. Improving care
2. Wider impact
3. Corporate responsibility
4. Innovation
5. Capacity building

Foundational Research Values

Kindness and care:	Our research processes are firmly rooted in respect and dignity, ensuring all participants are treated with utmost care and consideration and measures are put in place to safeguard people from potential harm.
Strong teams:	We champion a learning environment that values interdisciplinary collaboration. Our commitment is to foster openness and teamwork in all research endeavours.
Resilience and composure:	Tackling challenging problems head-on is our forte. We promote healthy debates and handle disagreements with readiness and maturity.
Strive for excellence:	Our research is always marked by clarity of purpose and stringent methodological standards, ensuring the highest quality in outcomes.
Communication:	From recruitment to dissemination, we prioritise clear and accessible information, ensuring our research is inclusive and can be understood by all.
Lead and empower:	By sharing our findings, we aim to be at the forefront of the sector, empowering others with our knowledge and insights

Our Research Values

Privacy and confidentiality

- We safeguard the privacy and confidentiality of all research participants, ensuring that their personal information and data are protected.

Integrity and transparency

- Always tell the truth
- Use plain language
- Create usable results

Respect for dignity and autonomy

- Recognition of individual rights
- Voluntary
- Inclusivity
- Cultural sensitivity
- Language guidelines

Beneficence and non-maleficence

- Safeguarding
- Cognitive considerations
- Research set-up
- Facilitating effective communication
- Ongoing consent

Research Partnerships

CCREATE-AGE
CENTRE FOR CO-CREATED
AGEING RESEARCH

Dementia Research Studies

- Dementia-friendly communication
- Music therapy for residents
- Use of supplements and food in mood
- Reducing distressed behaviour
- Communication using AI technologies
- Improving continence maintenance with care partners
- Polypharmacy

How is the Research Disseminated?

1. Internal dissemination

- Regular team member training
- Internal reports

2. Organisational learning

- Integration into care practices
- Continuous improvement programs

3. Impact on resident outcomes

- Enhanced quality of life
- Resident and family engagement
